

Reader Submission: #loveyougeezy

February 27, 2012

On Wednesday night, February 22nd, Fencing Team member Guram Abashidze had his first seizure ever and was taken to the Mount Nittany hospital. After some scans they noticed that he had some swelling and that they would send him to a larger hospital. When he arrived, more scans and MRI's were taken and it was discovered that he had a tumor on the left frontal lobe of his brain. Guram and his Family have decided to have his surgery on Monday. We are trying to start a twitter trend.

#loveyougeezy.
