

User Submission: Footnote

July 24, 2012

Some decades from now, those involved in the recent unpleasantness will be nothing more than footnotes in case studies, the perpetrators, victims and punishers. In harshest terms, it will be known as a dark time; in a kinder light, it will be thought of as a period of rebuilding. It is from that time, though, that they will come. In the thousands they will come to take on positions of power, responsibility and service. They will do so with confidence and humility. They will do this because they will be Penn State alumni and they will be strong. I know this to be true, for my daughter will be among them and I could not be more proud.

“A champion is someone who gets up even when he can’t.”
