

Centre Daily Times Editorial: Class of 2016 Moving Forward

July 25, 2012

Penn State's Class of 2016 will go down in history for its symbolic stand on the given scenario.

We came into this institution knowing we would have to bleed just a little more of our school colors for the world to understand what it means to be a part of Penn State. We came into this institution ready to take what was thrown at us and turn it into something positive. And we came into this institution to heal the wounds with confidence.

I'm sure the front page of Tuesday's paper had us on the breach of tears due to a change we have never experience before.

The decisions made in the past couple of days will only make our culture stronger.

We have all heard this saying before: "We are not just a football school."

And while many scoff at those words in disbelief, I want to offer a moment of preparation; to prepare the world for the next four years to be proved wrong. The Penn State Class of 2016 will be the start of rebuilding, with nothing but positivity and the utmost strength among any university in the world – and we are ready.
